- 
- The screenshot displays the 'Reports' module interface. On the left is a sidebar with a navigation menu. The main area shows a 'Report List' table with columns for Name, Description, and Status. Below the table, a 'Detailed Report View' for 'Accounts with a Credit Balance' is shown, featuring a table with columns: Date, Name, Amount of the balance, and Amount. The table lists several accounts with their respective dates and amounts. At the bottom, summary statistics are provided: 'Number of Accounts: 10' and 'Total Credit: 1,000.00'.

Billing & Payments

- Ledger Management.
- Multiple Payment Methods.
- Billing: Handle patient and insurance billing with line-item tracking.
- Printing: Easily print statements, receipts, and reports.

A screenshot of a medical billing software interface. The window title is 'Ledger (Agencies, Factors)'. It displays a table with multiple columns, including patient names, account numbers, and various financial fields. The table is populated with data, showing a list of accounts and their associated charges and payments. The interface includes a sidebar with navigation options and a top menu bar.

- Compliance with healthcare quality requirements.

Why DentiMax?

The software was introduced into Middle East market around 2006 and has been implemented widely within the region for thousands of users within Dental practices, the software has proven its capability to adapt with the rapid changes in this market and meet acceptance of users as most user-friendly interface for dentistry staff including backend and front office.

MEMITS Solutions LLC introducing Dentimax products fully integrated and adopted to the regional requirements including:

- ERA (electronic remittance advice direct posting).
- Automated SMS appointment reminders.
- Capturing information from smart ID cards.
- Computerized Telephony Interface showing who is calling and needed details like coming appointments balance & assigned provider.
- Local support by long years experienced team with multilingual and clinical background combined with IT experience.

DentiMax

DentiMax Dream Sensors
The ideal choice for cutting-edge
dental practices.

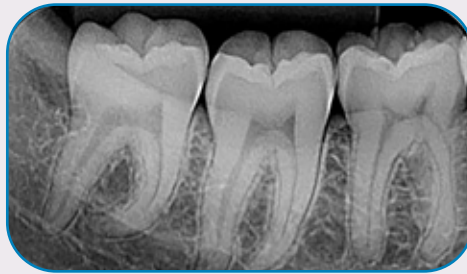

DentiMax Dream Sensors: Premium Digital Radiography

Exceptional Image Quality

Featuring advanced CMOS technology, DentiMax sensors provide crystal-clear, high-resolution x-ray images for accurate diagnostics.

Unmatched Patient Comfort

With a thin profile (5.5 mm) and rounded, beveled edges, DentiMax sensors ensure maximum comfort for patients. Available in two sizes to accommodate both adults and children.

DentiMax Dream Sensors: Premium Digital Radiography

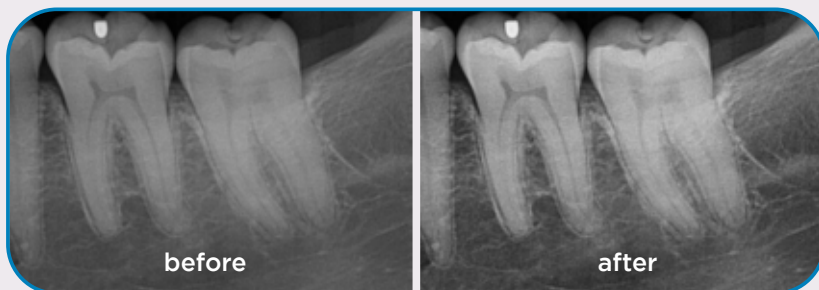

Durability

Built with a rugged, water-tight design and reinforced cable for long-lasting performance.

Enhanced Functionality

Zoom and image enhancement features allow for better diagnosis and treatment planning.
