MEDiVision

MEDiVision + brings 25 years of experience into one product, for your whole practice. Engage, educate, and entertain your patients at every step, before, during, and after their time at the practice.

MEDiVision + provides features to help achieve the goals you set; improving engagement from social posts, saving time during the clinical day, increasing inquiries, or converting more treatment proposals.

Dental Videos For Practice Sales And Patient Education

- Engage, educate and entertain your patients
- Enhance your website and social media
- Increase treatment plan conversion
- Grow practice revenue using targeted marketing
- Showcase your staff and services

Helping Your Practice To Grow

From first impressions on your website to treatment completion, MEDiVision solutions give your patients the information they need, in a format they understand.

Our combination of real videos and patient friendly animations, plus first class customer support, provides your dental team with the tools to succeed.

MEDiVision Waiting Room

Are you making the most of your waiting room?

Engage, entertain and educate your patients whilst they wait. Simply create and manage playlists to promote your services, advertise your products and grow your business.

You do not need to install any software and can control your playlists from any internet connected device.

Our Android media players come pre-loaded with content from MEDiVision and many popular brands, plus you can upload your own content.

It also includes "Envoy" the patient call facility, helping the team to streamline the transition between patients.

Main Features

MEDiVision Waiting Room

Envoy Patient Call

Minimise staff movement and call your patients into operating room with just a few easy clicks. Standard alert or voice notification sounds are available and you can choose which TVs to display them on.

Background Music

Choose from royalty free music or upload your own. Background music plays through the TV's own speakers and will mute if an Envoy message or video soundtrack is played.

Event Videos

Automatically play seasonal and event related videos keeping your waiting room content current. There are over 30 to choose from including Eid Al-Adha, Ramadan & New Year's Day.

Multi Display Modes

Switch between full screen, fully zoned and hybrid display modes depending on your preference. Capture your patients' attention with up to date information, promoting your brand, products, services and staff without interruption.

Main Features

MEDiVision Waiting Room

Content Templates

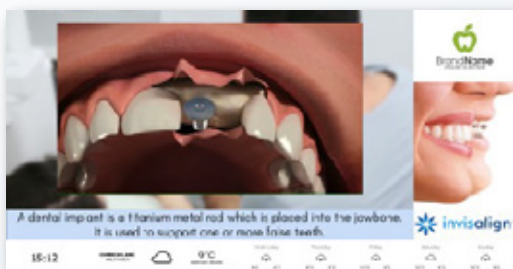

If you don't have digital creative skills in house, no problem. Use our content generators to showcase your work, promote your services and special offers.

Screen Capture

No matter where you are, you can easily see what is currently being played on any of your media players.

MEDiVision Communicator

Communicator is an interactive software to help explain conditions, procedures and treatment options to your patients.

An especially powerful tool for treatment care coordinators, it can be used by anyone in the dental team to help patients make an informed decision on their treatment options.

For patients who wish to take information away, leaflets can be printed or the treatment videos can be e-mailed allowing the sales cycle to continue away from the practice.

Main Features

MEDiVision Communicator

Treatment Options

Real video, subtitles and animation combined are a powerful tool in helping patients to understand their options and a powerful tool to help generate inbound enquiries.

Patient Testimonials

A simple tool to display those all-important patient testimonials. There is no need for any web design skills, videos are easily uploaded and will play within the allocated container. Build a playlist of testimonials and patients will have a different experience every time they visit.

Treatment Videos

For patients who want more detail, our animated treatment videos will help them understand treatment processes. Providing information in this way helps to build trust and confidence, increase treatment enquiries and plan conversions

Main Features

MEDiVision Communicator

Customisable Containers

Whether it is a welcome from the practice principal, a demonstration of bushing technique or other top tips from a hygienist, the video content in these containers is easily managed by staff with no need for web design skills. Make them fun, make them educational, make them promotional. The choice is yours.

Instructional Videos

Promote habit change in your patients by placing oral hygiene instruction videos on your website. Supporting education at the practice with accessible content at home will lead to better patient compliance and improved outcomes.

Social Media Content

Take advantage of our content specifically designed for social media. Grow your business and increase presence on the Internet by sharing informative and easy to understand images and videos on your social media channel.
