Paragon[®] (EMR)

Community Hospitals: 7 Things to Look for in an EHR

Community hospitals are navigating complex challenges, from juggling staff needs to addressing shrinking margins and nurturing community relationships.

An effective EHR can help you meet these challenges and stay ahead in the rapidly changing world of healthcare.

7 Key Features to Look For in an EHR:

With Paragon, you can deliver effective healthcare through efficient solutions.

Its EHR builds a single patient record with integrated clinical, financial, and ambulatory solutions on a managed, cloud-deployed platform.

Paragon[®] (EMR)

Paragon Ambulatory Care EHR: The Seamless Connection to Inpatient Care

For community hospitals, supporting multi-specialty outpatient medical practices can be complex.

The Paragon Ambulatory Care EHR is a fully integrated supplement to the core Paragon EHR, designed to simplify workflows and improve care coordination.

Key Benefits:

Coordinated Patient Care:

Coordinates care across the continuum, which helps improve patient satisfaction and minimizes redundancies

Efficient Workflows:

Integrates streamlined workflows with access to all necessary health data, allowing providers to complete tasks more

Simple Deployment

Delivers a consistent and non-complex enterprise solution with a repeatable implementation process across all care settings.

Promotes Physician Adoption:

Provides physicians with the same tools across all care settings, which can lead to rapid adoption and improved utilization.

Paragon Claims Management: Accelerate Your Revenue Cycle

Timely cash flow is critical for a healthy revenue cycle. Paragon Claims Management is a powerful tool designed to help you generate industry-standard electronic claims and streamline your financial operations.

How It Helps:

Accelerate Cash Flow:

The solution performs editing before claims are sent to the payer, which increases the clean claim rate and reduces rework.

Increase Staff Efficiency:

It provides increased visibility into the lifecycle of claims and offers guidance for proactive follow-up, helping to improve staff utilization.

User-Friendly Interface:

The intuitive interface minimizes training needs and clearly highlights claim errors, making them easier to fix and revalidate.

Ensure Accuracy:

It enables close scrutiny of all claims, helping your health system stay compliant with changing rules and regulations.

Claim Visibility:

Claims are readily available for easy viewing and include a tracking audit trail for all claim activity.

Paragon Clinician Mobile: Your EHR, Anywhere

Clinicians are constantly seeking ways to increase their efficiency and productivity.

The Paragon Clinician Mobile application provides rapid, effective mobile access to patient-specific clinical data, allowing providers to extend their reach beyond the clinic or nursing unit.

Key Benefits:

Flexible and Efficient Care:

Deliver better care with the flexibility to access critical information from a mobile device.

Improved Satisfaction:

The ability to access patient information on-the-go can improve both clinician and patient satisfaction.

Enhanced Rounding Processes:

Streamline clinical rounding with all the information you need at your fingertips.

Par

Essential Features:

Anytime, Anywhere Access:

Fast and effective mobile access to patient-specific data from anywhere and at any time.

Electronic Ordering:

Place electronic orders directly from your mobile device.

Real-time Data:

Share real-time data with patients, fostering greater engagement.

Alerts and Tasks:

Manage alerts and tasks for patients in your work queues.

Native Device Capabilities:

Optimized for Apple iPad and smartphone interactions.

Paragon Datasheet:

A Comprehensive Solution for Community Hospitals

Paragon is an integrated EHR and financial/administrative solution designed specifically for smaller hospitals & community facilities. It is a fully configurable solution that provides robust, physician-centric workflows around a single patient record, from the operating room to the back office.

How It Helps You Succeed:

Increase Operational Efficiency:

Seamlessly move data across settings and stakeholders with a scalable, integrated platform.

Promote Clinician Adoption:

Delivers clinical information and decision support tools at the point of care with an "experience-centric" approach.

Modern Technology:

Built on a single, fully normalized Microsoft SQL database, which simplifies data management and helps avoid expensive and disruptive upgrades.

Ensure Regulatory Readiness:

As an ONC-certified solution, Paragon has a successful track record of enabling organizations to provide better patient care while staying current with complex and changing regulations.

Improve Financial Workflows:

Paragon Financials is lauded by clients for its functionality and ease of use for new users.

Paragon Denali:

The Future of Cloud-Native EHR

Paragon Denali is a cloud-native, SaaS (software as a service) EHR and financial/administrative solution for rural, critical access, and community hospitals.

It is designed to help you reduce costs and downtime while preparing your organization for the future.

Addressing Key Challenges:

System Downtime:

With its cloud-native deployment model, Paragon Denali can reduce downtime, with most upgrades taking fewer than five minutes. This helps avoid the financial strain that downtime can place on hospitals.

Lowering Total Cost of Ownership (TCO):

Paragon Denali provides a predictable TCO, allowing the entire enterprise to increase financial efficiencies.

Operational Inefficiencies:

Clinicians can harness a single database system to maintain operational efficiencies and provide effective patient care.

Why Choose Denali?

Single-Vendor Partnership

Gain the unique advantage of a single vendor for all your clinical & financial operations, helping you navigate the healthcare landscape & maximize performance.

Accelerated Innovation

Get incremental features and fixes more quickly & efficiently.

Comprehensive Software

A broad suite of user-friendly clinical & financial applications with anytime, anywhere internet access.

Paragon Platform:

An Integrated Solution for Total Hospital Management

Paragon is more than just an EHR; it is an integrated clinical, financial, & ambulatory solution that helps you effectively manage your organization and deliver efficient care.

It is a complete EHR designed for today's challenging healthcare environment with the adaptability to accommodate the future.

Key Benefits of an Integrated Platform:

Operating Efficiencies:

A fully integrated system helps produce operating efficiencies, eliminates single points of failure, and reduces data redundancy, complexity, and cost.

Lower Total Cost of Ownership:

The modern, non-proprietary platform helps reduce system operational complexity at a lower total cost of ownership.

Regulatory Compliance:

Paragon has a successful track record of helping organizations provide better patient care while staying current with the complex and changing regulatory environment.

Comprehensive Functionality:

Patient Access

Manage and control resources through coordinated patient scheduling for clinics, procedures, or exams.

Registration

Access patient admission, registration, and discharge information across episodes of care.

Health Information Management

An intuitive, cost-effective process for maintaining & updating medical records.

Utilization Review

Automate proactive inpatient case management from admission through discharge to reduce losses from unpaid patient days.

Release of Information

Track the release of patient health information data.
